

# DIOGO JUSTINO

FULLSTACK DEVELOPER

## > ABOUT

Hi, I am enthusiastic about computers and technology in general. I'm a fan of all types of puzzles, brainteasers. I also enjoy a good challenge.

After a year and a half in professional training on an academy with Microsoft products, a strong emphasis on practical classes without forgetting theoretical foundations, I have the necessary bases to start a professional career as a web application programmer. Looking for new challenges and in this way to explore, acquire new knowledge as well as soft skills in a continuous training process.

## > PROJECTS

### Bug Tracker

This web app currently working on, as the purpose of managing the life cycle of a IT projects, starts with authentication and main dashboard to overview all the tickets of the bugs and its severity.
